

Name: _____ Level(s): _____ Unit: _____

Unit Planning, Part 1

You saw and planned unit needs assessment activities and used guided questions, resources, and tools to sketch out a unit incorporating the four stages of learning.

In your class, conduct a unit needs assessment, sketch out and teach the unit incorporating the four stages of learning using tools and activities you learned about at the in-service or your own.

Use the following questions to reflect on the experience.

1. Briefly describe the unit needs assessment process and tools you used. Did it go well? Is there anything you would do differently?

2. Describe how you planned your unit following the needs assessment. What questions were helpful to consider? What resources did you consult? What tools did you use to sketch out your unit?

3. How did conducting the unit needs assessment and doing initial planning help you? What challenges and questions do you still have about unit planning?

4. Briefly describe any assessments you used during the unit. What did you learn from them?

*******Please bring this worksheet and your unit sketch to the March In-Service*******
